4 Adjustments for temporary exemption of central bank reserves	-
5 Adjustment for fiduciary assets recognised on the balance sheet pursuant to the operative accounting framework but excluded from the leverage ratio exposure measure	-
6 Adjustments for regular way purchases and sales of financial assets subject to trade date accounting	-

² Other adjustments consist of:

- Reclassification for general provisions on loans - This amount is reported with the assets on the financial statements but are reported with the liabilities on the quarterly prudential returns for regulatory reporting purposes.
- Reclassification for other assets - The credit balances for suspense accounts, stale dated cheques and items in course of collection that are reported in the overall other assets on the financial statements are individually identified and reported with the liabilities on quarterly prudential returns for regulatory reporting purposes.
- Reclassification for other liabilities - The debit balance for payroll liabilities that is reported in the overall other liabilities on the financial statements is identified and reported with the assets on quarterly prudential returns for regulatory reporting purposes.

3.2 LR2 - Leverage Ratio

The Bank's exposure to liquidity risk is governed by a Liquidity Management Policy and Framework approved by the FirstCaribbean International Bank Limited's Board of Directors. The Asset and Liability Management Team is responsible for monitoring liquidity risk and adherence to the Liquidity Management Policy. Day-to-day management of liquidity is handled by the Treasury team. The Treasury team performs stress tests and scenario analysis to evaluate the impact of stresses on its liquidity position. The results are independently reviewed by the market risk function and reported to the Board of Directors quarterly.

The Bank maintains a stable pool of high-quality liquid assets (HQLA) reflecting the strength of its balance sheet and adequate short-term placements to cover cash flows under stress. The HQLA is made up of notes and coins, withdrawable balances at Central Banks (branches in Curacao and St. Maarten) and low risk marketable securities. The liquidity coverage ratio remained above regulatory requirements and management thresholds.
